Gayle Fitzpatrick: Printmaking - Process & Exploration  
Suggested donation \$50

Printmaking is an artistic process based on the principle of transferring images from a matrix onto another surface, most often paper or fabric. Participants will begin with a single object being used to make infinite images of that object. They will gain a basic understanding of the printing process and will explore the printing possibilities of natural and found objects. We'll also undertake the single block relief printing process as we complete our day, by developing a Lino print: carving the linoleum block, inking it, and printing a small edition.
